ARCHITECTURAL DATA FORM, CONTINUATION.

Material of Construction: frame cupola. Roof covered with patterned slate shingle hung from board and lath sub-roof. Floor joists for attic level under cupola of 1" by 10" board stiffened with bracing. Second floor, second period partitions (dating from building conversion ca. 1891) of vertical board horizontally lathed and plastered. All wood building materials mechanically sawn (sash and circular) and fastened with fully developed cut nails.

Shape and Dimensions of Structure: rooms across laid out behind a symetrically balanced five-bay elevation. Original dimensions 54' by 33'; mid 19th-century gable wing south elevation 17'4" by 23'; late 19th-century rear west elevation brick dining hall wing 53'6" by 30'. See sketch plan.

Exterior Features of Note: brackets, upper architrave of each window broken with a slightly projecting cartouche. Projecting two-story bow window on the west elevation with each face pierced by single light sash windows (replaced), architraves of milled board with bossed upper corners, opening size diminishes from first to second story, floor division highlighted by drip line, shallow hipped roof with projecting cornice carried on flattened profile machine scroll-sawn brackets.

Shape and Dimensions of Building: Note attached second floor plan of the dwelling reflecting changes made during conversion to Minquedale Home for the Aged. Scale in feet.

Minquedale Home for the Aged, New Castle Hundred, New Castle County, Delaware. Second floor plan (scale in feet) reflecting changes made in 1891.
